The Logo

Logo’s shape

The CK brand strongly emphasizes the hexagonal shape of the logo, which forms the foundation of the design system. This symmetrical and visually appealing shape helps create a clean and recognizable identity. By using the hexagon across different layouts, it becomes a signature element that reinforces the brand message in a consistent and clear way. The hexagon reflects CKEditor’s core values of structure, adaptability, and completeness, making it a key part of the visual identity.

The Logo

CKEditor logo safe space

The CKEditor logo is a key element of our brand identity and must always have enough clear space around it, free from other elements.

The symbol may be used on its own in some cases, but the full logo should be used whenever possible.

Following these guidelines helps ensure consistency and strengthens brand recognition.

The Logo

CKEditor logo usage and color variations

On light backgrounds, the logo appears in CK Purple, Lime, and Black. On very dark backgrounds, the black typographic part changes to white, while the CK symbol remains the same.

The minimum logo size is 120 pixels for digital use and 26 mm (1.18 inches) for print to ensure visibility. The symbol alone should be at least 75 pixels for digital use and 10 mm (0.4 inches) for print.

Following these guidelines helps maintain consistency and strengthen brand recognition.

The Logo

CKEditor logo placement & sizing

Consistent logo placement helps create a unified and professional brand look across all materials. To ensure clarity and visual balance, follow these guidelines.

Placement

- Horizontal layouts (e.g. widescreen formats):
The logo should take up 1/5 of the layout’s width.
- Vertical layouts (e.g. A4 proportions):
The logo should take up 1/4 of the layout’s width.

Margins

In both cases, keep clear space around the logo equal to the height of the logo icon. Note that the icon is vertically oriented, so its height is greater than its width.

Positioning on non-website assets

- Place the logo in the top right corner or center, depending on the layout.
- Do not place the logo in the top left or at the bottom of the layout.

Color

CKEditor Brandbook 2026

Primary Colors

Primary color usage guidelines

The primary brand colors are key elements of CKEditor’s visual identity and should be the most visible in all design applications. They reflect the brand’s personality and are used across key touchpoints, including the logo, marketing materials, and digital products. Consistent use of these colors helps create a recognizable and cohesive brand image.

The primary colors include:

- CK Purple: mainly used in the logo and for highlights.
- CK Lime: used in the logo and for highlights on dark backgrounds.
- Deep Purple: mainly used for backgrounds..

Primary colors should lead the visual identity, while secondary colors support and complement the main palette. Following these guidelines helps maintain consistency and strengthen CKEditor’s brand recognition.

Secondary Colors

Secondary color usage guidelines

The secondary color palette supports the primary colors and adds flexibility while maintaining brand consistency. These colors are mainly used for feature illustrations and backgrounds.

Secondary colors should support the primary colors and should not dominate them.

Using these guidelines helps enrich the visual identity while keeping the focus on CKEditor’s primary colors and strengthening brand recognition.

Tints

Tints usage guidelines

Tints are lighter versions of our brand colors, created by adding white. They can add depth, establish hierarchy, or soften the overall look without introducing new colors. Use tints sparingly to maintain visual clarity and brand consistency.

Typography

Primary font usage guidelines

Mulish is our primary font, chosen to ensure consistency and a unified visual identity across all brand materials, including marketing and social media. We use Mulish in all layouts, with ExtraBlack, Bold, Regular, and Light weights for flexibility. Its modern, clean design improves readability and supports a professional tone.

Font styles are selected based on context, but readability and accessibility, according to WCAG standards, are always prioritized. Consistent use of Mulish strengthens CKEditor's visibility and clarity across all platforms.

Typography

Secondary font usage guidelines

Public Sans is our secondary font, mainly used for large blocks of text, such as documentation. It provides a clean and readable option for extended content.

Mulish should always take priority as the primary font in all designs. Public Sans is not intended for main headlines or call-to-action elements, ensuring that Mulish remains the focal point.

CKEditor 5 is a flexible editing framework that provides every type of WYSIWYG editing solution imaginable. From editors similar to Google Docs and Medium to Notion, Slack, or Twitter-like applications, all is possible within a single editing framework. It is a modern JavaScript rich-text editor with MVC architecture, custom data model, and virtual DOM, written from scratch in TypeScript with excellent support for modern bundlers. Find out the most convenient way to start using it!

CKEditor 5 is a native JavaScript rich-text editing component written in TypeScript. As such, it is framework-agnostic and can be integrated with any JavaScript framework and application. It does not require any uncommon techniques or technologies to be used. Therefore, unless the framework you use has atypical limitations, CKEditor 5 is compatible with it.

Grid & Pattern

CKEditor Brandbook 2026

The grid

The power of isometric grid

In addition to the logo, the isometric grid is a key element of the refreshed CK brand. Inspired by the logo’s shape, the grid is used throughout the design system to reinforce the brand’s core message.

- **Comprehensive/complete:** The grid reflects CKEditor’s structure and interconnectedness, showing how all features work together as a complete solution.
- **Enterprise-ready and stable:** Its precision and balance symbolize reliability, scalability, and readiness for high-performance enterprise use.
- **Highly customizable:** The grid’s flexibility represents CKEditor’s ability to adapt to unique needs, just like its modular and customizable design.

The isometric grid embodies CKEditor’s essence, balancing order and adaptability while highlighting its power and completeness. Integrating it into the design system ensures these qualities are consistently reinforced.

The isometric grid pattern

The isometric grid pattern

The isometric pattern is a visual representation of the grid on the layout. It can serve as a brand-building element to strengthen brand awareness and recognition. It's used in backgrounds and beneath product visuals to reinforce messages of completeness, stability, or customization.

The pattern can also form simple shapes, like arrows or repeated elements, to further emphasize the message. The pattern can be used on dark or light backgrounds.

The pattern

The isometric pattern usage guidelines

The pattern can be used on dark or light backgrounds and can form simple shapes, such as arrows or repeated elements, to reinforce the message.

The pattern should always include a gradient, though some lines may be removed if needed. It must remain harmonious and balanced at all times.

On dark backgrounds, the gradient starts with the light color, CK Lime.
On light backgrounds, it starts with the dark color, CK Purple.

The gradient can follow the same direction as the grid lines, be vertical, or diagonal.

Icons

CKEditor Brandbook 2026

Icons

Iconsusage guidelines

Icons are used to support text and highlight CKEditor features. Their style adapts to the background, ensuring clear visibility on both light and dark surfaces.

Thoughtful use of icons enhances the user experience and visual appeal of CKEditor materials.

On the website, we have icons in 2 sizes:

- Large: fits into a 60×60 px square
- Small: fits into a 44×44 px square

If the icons are used for other assets, like social media or blog headers, they may be scaled proportionally with the stroke.
