

Tiugo Technologies

Product Visual Tier System

Product Visuals in 4 Tiers

We have created **4 product visual tiers** for Tiugo products to ensure consistency and clarity across assets. The tiers are defined based on the **type of asset** they'll be used in, the **target audience** they're meant for, and the **intended message** meant to be conveyed.

Each tier, except **Tier 1**, requires a **detailed brief** with **screenshots** showing the product or feature in use. Additionally, **Tier 4** must include a description of the **business value** the feature provides. This structured approach will streamline the process and help the creative team focus on the most relevant aspects when creating visuals.

Tier 1 – Focus on Product Functionality

Persona: developers, designers, product managers

Context: documentation, release/technical/feature-focused blog posts (in-text illustrations), detailed how-to videos for the developer audience

Design Characteristics:

- Product UI is 1:1 what it is in reality (screenshot or 1:1 recreation)
- When we focus on details or features, we don't obscure the toolbar or any other product UI parts

Visual Hierarchy

- 1) Full product
- 2) Feature
- 3) Value

Tier 1 – Examples

Revision History

Paragraph

1 / 3

Revision History

Expense Analysis

Our total expenses for the year were \$8 million. The major expense categories were product development (30%), marketing and sales (25%), and administrative costs (70%). We have managed to keep our administrative costs steady while in and marketing to drive growth.

Expense Category	Change (%)
Product Development	
Marketing and Sales	
Administrative Costs	1.6
Total	5.6

Profitability Analysis

Our net profit margin improved from 15% to 20%, indicating our generating profits. Our gross profit margin also saw an improvement in optimizing our production process and supply chain management.

Tier 2 – Focus on Feature Functionality

Persona: developers, designers, product managers

Context: feature pages, feature/release blog posts, feature documentation

Design Characteristics:

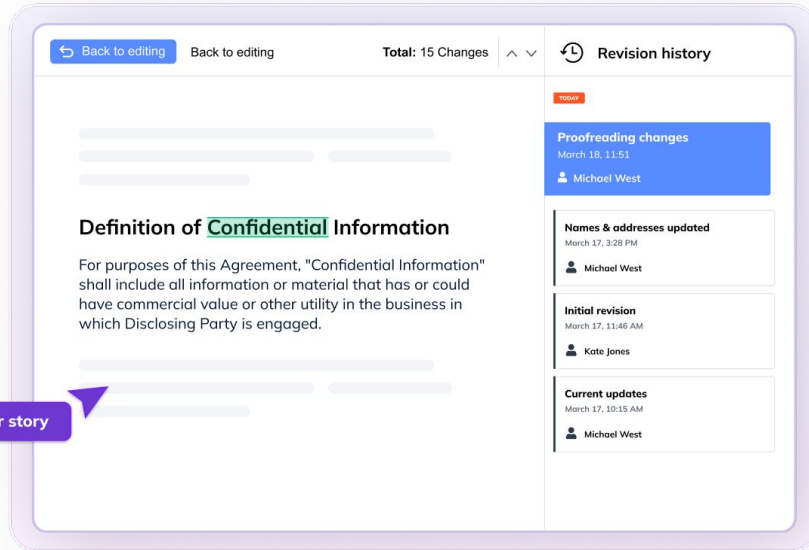

- UI connected to the feature we want to communicate stays detailed
- Parts of the product UI stay detailed, but only in the context of the feature in focus (ie. we don't need to show the full toolbar of a selected preset, just the features important in the given context)
- Content inside the product remains readable and makes sense in terms of the feature in focus

Visual Hierarchy

- 1) Feature
- 2) Product
- 3) Value

Tier 2 – Examples

Tables

The screenshot shows a document editor interface. At the top, there's a navigation bar with "Back to editing" and "Total: 15 Changes". Below this, the main content area displays a paragraph titled "Definition of Confidential Information". To the right, a "Revision history" panel is visible, showing a list of changes made by Michael West and Kate Jones. A purple callout bubble with the text "Check your story" points to the main content area.

Revision History

The screenshot shows a document editor interface. At the top, there's a navigation bar with "1 / 3" and various editing tools. Below this, the main content area displays a table with three columns: "Expense Category", "Production dates", and "Change (%)". A "Cell properties" panel is open, showing options for border, background, and dimensions. The table has a yellow border and a blue background for the "Marketing and Sales" row.

1 / 3

Expense Category	Production dates	Change (%)
Product Development	1.2	9
Marketing and Sales	1.6	
Administrative Costs	5.6

Tier 3 – Focus on the Feature Functionality & Value

Persona: product managers, developers, C-suite

Context: high-level feature introduction, feature collage, display ads, event leaflets, website - landing pages and campaigns

Design Characteristics:

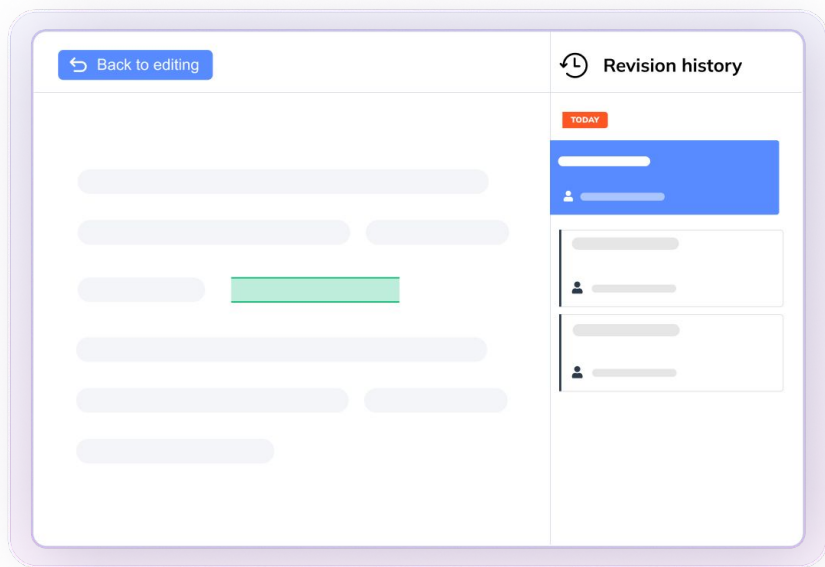

- UI of the product and the content inside the product stay obscured (a mock-up)
- Feature or context are represented by fragments of the UI (don't have to be 1:1) and iconography that communicates the general functionality or message

Visual Hierarchy

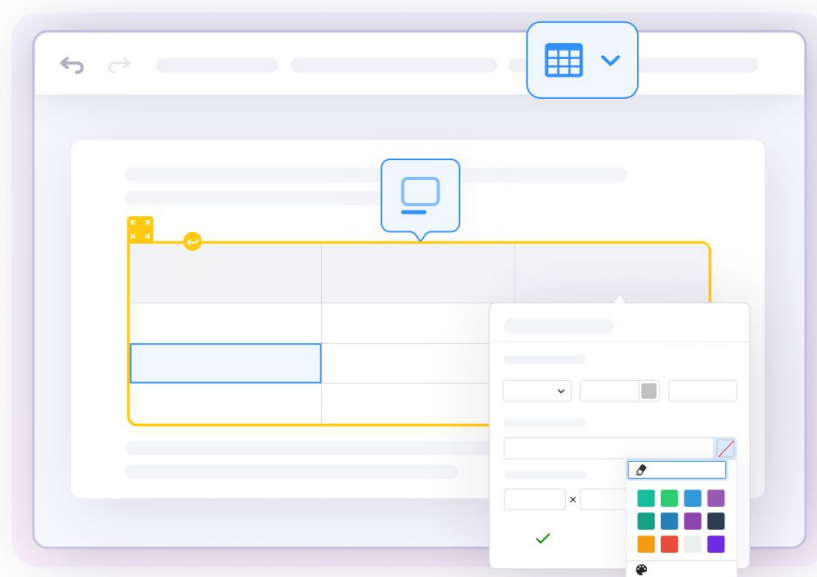

- 1) Feature
- 2) Value
- 3) Product

Tier 3 – Examples

Tables

Revision History

Tier 4 – Focus on the Feature/Capability Value

Persona: C-suite, upper-level decision-makers, senior product managers

Context: slide decks, social media, display ads, showing business benefits that are not reflected directly by the product UI

Design Characteristics:

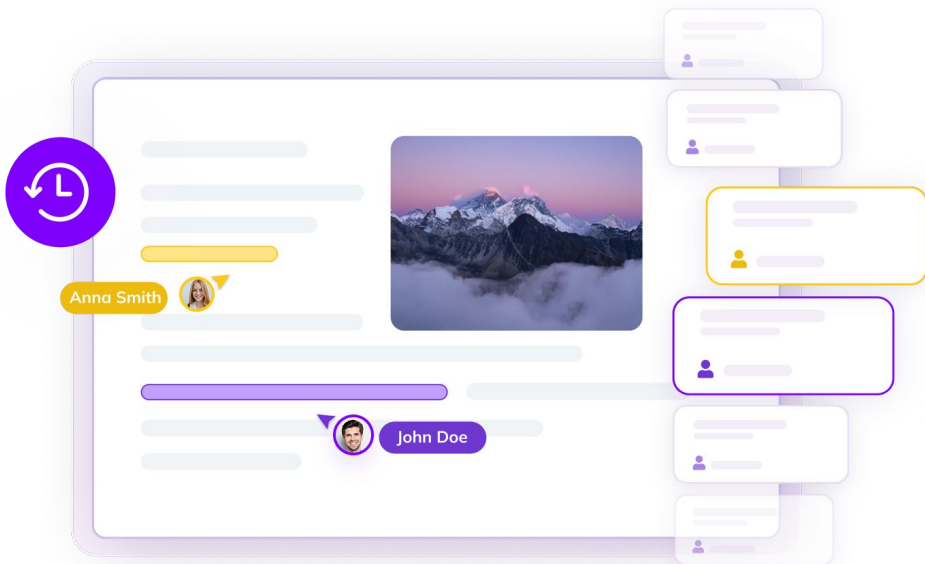

- Abstract images connected to benefits (extensibility, security, customer satisfaction, availability, stability, etc.)
- Can differ from the product UI, however should create an association with the particular product

Visual Hierarchy

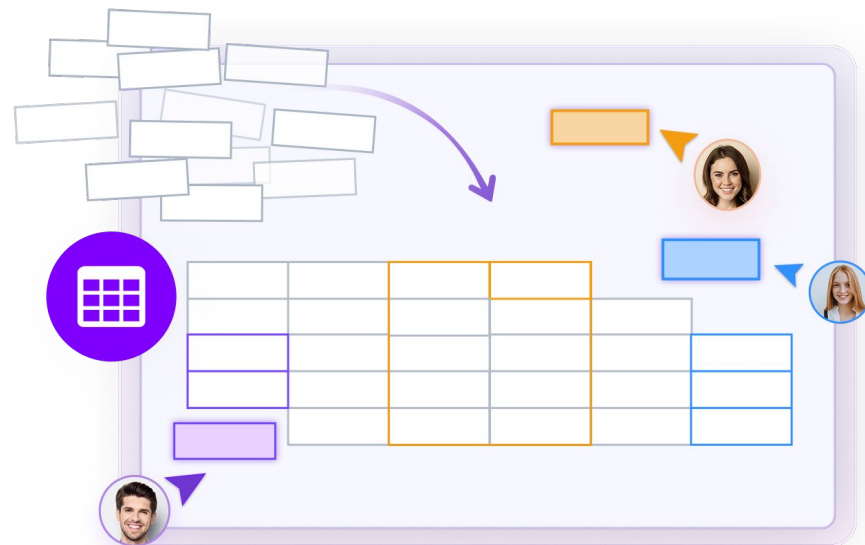

- 1) Value
- 2) Features
- 3) Product
